Shares Outstanding: 68,572,090

Options: 5,533,331

Warrants: 52,207,000

**Fully Diluted: 126,312,421**

52 Week High/Low: \$0.145 - \$0.05

Total Boreholes Drilled: 628

Deepest Hole Drilled: 522 mbs

Average Drill Depth: 200 mbs

**New Age Metals has North America's largest, undeveloped, primary platinum group metals deposit at our 100% owned River Valley project, located in Sudbury Ontario.**

- Last resource estimate done was in 2012, showing 2.4 million ounces of PGMs.

Contained Metals Contents	PGM + Au (oz)	PdEq (oz)	PtEq (oz)	AuEq (oz)
Total Measured & Indicated	2,463,060	3,942,910	1,847,200	2,779,610
Inferred	614,500	1,201,000	571,000	571,000

Category	Tonnes	Pd g/t	Pt g/t	Rh g/t	Au g/t	Ag g/t	Cu g/t	Ni g/t	Co g/t	Pd Eq g/t
Measured & Indicated	91,339,550	0.58	0.22	0.021	0.004	0.34	0.06	0.02	0.003	1.38
Inferred	35,911,000	0.36	0.14	0.014	0.03	0.11	0.06	0.03	0.003	1.07

- In 2015 discovered new high grade zone: Pine Zone. Drilling done has confirmed continued mineralization 140 metres off the original mineralized zone, confirming the potential for future open pit mining.
- In September 2017, independent analyst Sid Rajeev from Fundamental Research, initiated coverage on New Age Metals with a buy rating and target price of \$0.49, a 600% increase from the current valuation.
- As calculated in Sid Rajeev's report, New Age Metals has an Enterprise Value/Resource of \$0.68, less than the cost of a coffee at Starbucks! At \$0.68 we are 5 times cheaper than our nearest competitor!
- The project is 80 kms from world class metallurgical complexes in Sudbury.
- The project is moving towards production: mining leases, agreements with First Nations, all weather highway access right to the site, power and rail nearby.
- According to an independent appraisal in 2015 by SFA Oxford, the deposit is one of the shallowest in the world, hard rock, thick deposit, making it very amenable to an open pit mining operation.
- River Valley bears many similarities to North American Palladium's Lac-des-Iles deposit.
- New Age Metals has 5 Lithium projects in the Winnipeg River Pegmatite Field, 3 of which are drill ready, they are all within the shadow of one of the longest producing Lithium mines, the world class Tanco Mine. We are currently seeking joint-venture partners to move these projects along.
